Course	07070101-T – COMPUTER FUNDAMENTALS	Semester - 1
Type of Course	Major Core Course	
Prerequisite		
Course Objective	1. To provide computer skills and knowledge to enhance the understanding and usefulness of information technology tools for business operations. 2. To understand the uses and the basic operations of MS office. 3. To understand the utilizations of Spreadsheets in term of work field. 4. An opportunity to develop understanding of the basic operations of Computer System & Computer Application Software 5. To develop the skill of using computer applications software for solving problems.

Course	07120101 – ENVIRONMENTAL STUDIES	Semester - 1
Type of Course	Value Added Course	
Prerequisite		
Course Objective	<p>The Environmental Studies major prepares students for careers as leaders in understanding and addressing complex environmental issues from a problem-oriented, interdisciplinary perspective. Students:</p> <ol style="list-style-type: none"> 1. Master core concepts and methods from ecological and physical sciences and their application in environmental problem solving. 2. Master core concepts and methods from economic, political, and social analysis as they pertain to the design and evaluation of environmental policies and institutions. 3. Appreciate the ethical, cross-cultural, and historical context of environmental issues and the links between human and natural systems. 4. Understand the transnational character of environmental problems and ways of addressing them, including interactions across local to global scales.

NOTE : This specification table shall be treated as a general guideline for the students and the teachers. The actual distribution of marks in the question paper may vary slightly from above table.

Course Outcomes

At the end of this course, students will be able to:

CO1	Explain how data is shared over various networks.
CO2	Apply strategies to evaluate challenges in building networks and propose solutions.
CO3	Analyze the key technological components of networks and their interactions.
CO4	Describe the concepts of networking and the functions of each layer in the OSI and TCP/IP reference models.

Course	07120201 – DISASTER MANAGEMENT	Semester - 2
Type of Course	Value Added Course	
Prerequisite		
Course Objective	1. To provide the students with the basic information about Different Disasters and their management 2. Develop the student's ability to learn and understand Different government bodies working for disaster management and risk reduction. 3. Develop the students in the remedy common mistakes to be able to distinguish different law and strategies related to disaster management and mitigation. 4. To provide information about different rescue committees and governmental packages as compensation.

Suggested Distribution Of Theory Marks Using Bloom's Taxonomy

Level	Understanding	Application	Analyze
Weightage	40	30	30

NOTE : This specification table shall be treated as a general guideline for the students and the teachers. The actual distribution of marks in the question paper may vary slightly from above table.

Course Outcomes

At the end of this course, students will be able to:

CO1	Students will acquire the ability to design web pages with HTML.
CO2	Mastery of advanced HTML, creating dynamic, multimedia-rich, and interactive websites.
CO3	Students will demonstrate expertise in DHTML, HTML5, and CSS, enabling them to create dynamic, stylish, and responsive web designs.
CO4	Students create captivating web layouts using advanced CSS techniques effectively.

Course	07070302 – OPERATING SYSTEMS	Semester - 3
Type of Course	Major Core Course	
Prerequisite		
Course Objective	1. To familiarize students with the standard different Operating Systems. 2. Detail analysis of working pattern of Operating System and its several applications. 3. To understand the basics of programming of Operating System. 4. Detail knowledge about the rules and functions of Operating System.

Level	Understanding	Application	Analyze
Weightage	40	30	30

NOTE : This specification table shall be treated as a general guideline for the students and the teachers. The actual distribution of marks in the question paper may vary slightly from above table.

Course Outcomes	
At the end of this course, students will be able to:	
CO1	Understand Core Programming Knowledge.
CO2	Develop the concepts of Input/ Output, Arrays and Working with Classes.
CO3	Analyze the function Overloading and Inheritance
CO4	Explain OOP in C++ to serve several live projects in different segment of the globe.

Reference Books	
1.	Object Oriented Programming in C++ (Text Book) By E Balagurusamy Tata McGraw-Hill Publishing Co. Ltd.
2.	Object Oriented Programming in Turbo C++ By Robert Lafore Guide, Galgotia Pub. (P) Ltd.
3.	Object Oriented Programming in C++ By Barkakati N. PHI.

Course	07070402 – INFORMATION SECURITY	Semester - 4
Type of Course	Major Core Course	
Prerequisite		
Course Objective	1. To familiarize students with the standard different Security Systems. 2. Detail analysis of working pattern of Security System and its several applications. 3. To understand the basics of programming and detail concept of Security System. 4. Detail knowledge about the rules and functions of Security System for Ethics.

Level	Understanding	Application	Analyze
Weightage	40	30	30

NOTE : This specification table shall be treated as a general guideline for the students and the teachers. The actual distribution of marks in the question paper may vary slightly from above table.

Course Outcomes	
At the end of this course, students will be able to:	
CO1	Classify types of social media websites-mobile apps-email- social media-various social media websites.
CO2	Illustrate the Target Audience-Sharing content on Social Media Book marking websites.
CO3	Analyze tips of Social Media Marketing-Customization; Social Media Optimization.
CO4	Explain Establishing Relationship with customers Social Media.

Reference Books	
1.	Advertising and Promotions: An IMC Perspective (Text Book) By Kruti Shah & Alan D-Souza Tata McGraw Hill
2.	Advertising and Promotion: An IMC Approach (Text Book) By Terence A. Shimp Cengage Learning
3.	Sales Management: Concepts, Practice, and Case By Johnson F.M., Kurtz D.L., Scheuing E.E Tata McGraw Hill

Course	7070601-T – PROJECT MANAGERMENT	Semester - 6
Type of Course	Major Core Course	
Prerequisite		
Course Objective	1. To understand the need of Project Management. 2. To enables the students to learn about project identification, formulation, it's financial appraisal and implementations. 3. To provide conceptual clarification to small scale industry and the stages. 4. Involved in the establishment of small business.	

Teaching Scheme (Contact Hours)				Examination Scheme

Level	Understanding	Application	Analyze
Weightage	40	30	30

NOTE : This specification table shall be treated as a general guideline for the students and the teachers. The actual distribution of marks in the question paper may vary slightly from above table.

Course Outcomes	
At the end of this course, students will be able to:	
CO1	Demonstrate the fundamentals of project management its organization.
CO2	Utilize the concepts of project organizing, project planning and it's budgeting.
CO3	Analyze the project network and resource allocation in projects.
CO4	Illustrate the project monitoring and control.

2.	Software Project Management By Walker Royce Pearson Education
3.	Software Engineering : A Practitioner's Approach By Roger S. Pressman McGraw-Hill

Course	7070602 – DATA MINING AND WAREHOUSING	Semester - 6
Type of Course	Major Core Course	
Prerequisite		
Course Objective	- To understand the need of Data Warehouses. - To understand the need for Data Mining. - To learn the algorithms used for various types of Data Mining problems. - To understand the concept of Analytical Processing (OLAP).	

Teaching Scheme (Contact Hours)				Examination Scheme				
Lecture	Tutorial	Lab/Practical	Credit	Theory Marks		Practical Marks		Total Marks
				SEE(T)	CIA(T)	SEE(P)	CIA(P)	
3	1	-	4	70	30	-	-	100

SEE - Semester End Examination, CIA - Continuous Internal Assessment (It consists of Assignments/Seminars/Presentations/MCQ Tests, etc.)

Course Content		T - Teaching Hours W - Weightage	
Sr.	Topics	T	W
1	Introduction to Data Warehousing and Data Mining The modern Data warehouse, Data Warehouse roles and structure, need of Data Warehouse, The cost of Warehousing Data, Foundation of Data mining, The roots of Data Mining, The Approach to Data Exploration and Data Mining.	15	25
2	The Data Warehouse Stores, Warehouses and Marts, the Data Warehouse Architecture, Metadata, Metadata Extraction, Implementing Data Warehouse, Data Warehouse technologies.	15	25
3	Data Mining What is Data Mining, Online Analytical Processing, Techniques used to mine the data, Market Basket Analysis, Limitations and challenges to DM.	15	25
4	Data Analysis and Visualization Correlation, Covariance, Rank and Percentile, Histogram and Moving Average. Data Visualization with advance Charts: Stock Chart, Surface Chart, Donut Chart, Bubble Chart and Radar Chart.	15	25
Total		60	100

Level	Understanding	Application	Analyze
Weightage	40	30	30

NOTE : This specification table shall be treated as a general guideline for the students and the teachers. The actual distribution of marks in the question paper may vary slightly from above table.

Course Outcomes

At the end of this course, students will be able to:	
CO1	Understand Market Basket Analysis.
CO2	Learn various techniques to implement in Data Warehouse and Data Mining.
CO3	Analyze the usage, need and cost of Data Warehouse
CO4	Student should be reasonably good at recognize Data Warehouse and Data Mining.
Reference Books	

1.	Modern Data Warehousing, Mining and Visualization: Core Concepts By George M. Marakas Pearson Education
2.	Data Mining: Concepts and Techniques By Jiawei Han and Micheline Kamber Morgan Kaufmann Publishers
3.	Data Warehousing, Data Mining and OLAP By Alex Berson and Stephen J. Smith Tata McGraw-Hill
4.	Data Warehousing in the real World By Sam Anahory, Dennis Murray Pearson Education

Course	7990601 – BASIC OF STRATEGIC MANAGEMENT	Semester - 6
Type of Course	Major Core Course	
Prerequisite		
Course Objective	1. The present course aims at familiarizing the participants with the detail concepts of Strategic Management. 2. To enable them about various tools and techniques of corporate strategic management. 3. To develop analytical and conceptual skills and the ability to look at the totality of situations. 4. To help students develop skills for applying these concepts to the solution of business problems.

Course	7990602 – QUANTITATIVE TECHNIQUES	Semester - 6
Type of Course	Major Core Course	
Prerequisite		
Course Objective	1. To provide basic knowledge of analyzing data using various statistical and quantitative techniques for business decisions. 2. To enable better reporting for decision making. 3. To highlight the benefits as well as the limits of quantitative analysis in a real-world context. 4. The main focus of this course is to provide an understanding of basic statistical inference (tools) that are useful or necessary in managerial decision making.

SEE - Semester End Examination, CIA - Continuous Internal Assessment (It consists of Assignments/Seminars/Presentations/MCQ Tests, etc.)

Course Content		T - Teaching Hours W - Weightage	
Sr.	Topics	T	W
1	Introduction Meaning of Quantitative Techniques Classification of Quantitative Techniques Statistical Techniques Programming or Research Techniques Important Operations Research Techniques Role of Quantitative Techniques in Business & Industry Quantitative Techniques & Business Management Limitations of Quantitative Techniques.	15	25
2	Introduction to Statistics Meaning definition Statistics Functions of Statistics Importance and limitations of Statistics Collection of data Primary and Secondary data Schedule and questionnaire Frequency distribution Tabulation, Diagram Graphic presentation of data. Measures of Central Tendency and Dispersion: Definition of Central Tendency Objectives Central Tendency Characteristics of Measures of Central Tendency Types of Averages Arithmetic Mean, Geometric Mean Harmonic Mean, Median, Mode, Quartiles, Deciles, percentiles, Properties of averages and their application. Meaning, definitions, objectives of Dispersion, Range Quartile Deviation, Mean deviation, Standard Deviation Co-efficient of variation.	15	25
3	Measures of Correlation Meaning, Definition and use of correlation. Types of correlation Karl Pearson's correlation co-efficient Spearman's Rank correlation probable error Meaning utility of regression analysis Comparison between Correlation and Regression Regression Equations Interpretation of Regression Co-efficient.	15	25
4	Elementary Transportation	15	25

	Formulation of Transport Problem, Solution by N.W. Corner Rule, Least Cost method, Vogel's Approximation Method (VAM), Modified Distribution Method. (Special cases: Multiple Solutions, Maximization case, Unbalanced case, prohibited routes) Elementary Assignment: Hungarian Method, (Special cases: Multiple Solutions, Maximization case, Unbalanced case, Restrictions on assignment.)	
	Total	60 100

Suggested Distribution Of Theory Marks Using Bloom's Taxonomy

Level	Understanding	Application	Analyze
Weightage	40	30	30

NOTE : This specification table shall be treated as a general guideline for the students and the teachers. The actual distribution of marks in the question paper may vary slightly from above table.

Course Outcomes

At the end of this course, students will be able to:

CO1	Classify Multiple optimal solution, infeasibility, unbounded solution); simplex Methods.
CO2	Examine the Formulation of Transport Problem, Solution by N.W. Corner Rule, Least Cost Method, and Vogel's Approximation Method (VAM).
CO3	Organize the Construction of the Network diagram, Critical Path- float and slack analysis.
CO4	Discuss the Payoff Table, Opportunity Loss Table, Expected Monetary Value, Expected Opportunity Loss, Expected Value of Perfect Information and Sample Information Markov Chains.
